

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering Fabrication Trade

Course Description

This qualification defines the skills and knowledge required of an engineering tradesperson - fabrication within metal, engineering, manufacturing and associated industries. The qualification has been specifically developed to meet the needs of apprentices in the above trade.. The duration of the 0100627 Certificate III in Engineering is 20 contact hours per week for 94 weeks (training and work placement) and 18 weeks of holidays throughout the course.

Job Roles and Career Pathways

The qualification is designed for students wishing to enter the Metal and engineering industry for roles including including undertaking metal fabrication, structural steel erection, sheetmetal work, welding, blacksmithing and surface finishing. This course covers relevant employability skills. Full details can be found at <https://training.gov.au/Training/Details/MEM30319>

Entry Requirements

Course entry

There are no formal course entry requirements into this qualification. International students must meet visa, financial (fees/relevant costs) and English language proficiency requirements.

RTO entry

Students are required to have a limited knowledge and skill base in a variety of Metal and Engineering contexts including making judgements, completing routine activities and taking limited responsibility in the Metal and Engineering workplace.

Students are required to have language, literacy and numeracy skills as required to undertake these workplace functions. Proof of IELTS 5.5 is required as well as year 12 high school level completed.

Intake

Course start dates are as listed on the RTO training schedule.

Further Learning

Students who complete the 0100627 Certificate III in Engineering – Fabrication Trade can continue their studies by advancing to the MEM40119 Certificate IV in Engineering or any other relevant Certificate IV level qualification.

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering Fabrication Trade

Course Structure

To be awarded the MEM30319 Certificate III in Engineering – Fabrication Trade, units of competency to the minimum value of 96 points must be achieved, chosen as outlined below:

all core units of competency listed below (totalling 33 points)

elective units of competency to a minimum value of 64 points from Groups A, as described below to bring the total value to 97 points.

The following units of competency may be delivered for this qualification subject to the selection of elective units.

	Unit Code	Unit Title	Core/Elective	P	Pre Req
1.	MEM09002	Interpret technical drawing	Core	4	*
2.	MEM11011	Undertake manual handling	Core	2	*
3.	MEM12023	Perform engineering measurements	Core	5	*
4.	MEM12024	Perform computations	Core	3	*
5.	MEM13015	Work safely and effectively in manufacturing and engineering	Core	2	
6.	MEM14006	Plan work activities	Core	4	*
7.	MEM16006	Organise and communicate information	Core	2	*
8.	MEM16008	Interact with computing technology	Core	2	*
9.	MEM17003	Assist in the provision of on-the-job training	Core	2	*
10.	MEM18001	Use hand tools	Core	2	*
11.	MEM18002	Use power tools/hand held operations	Core	2	*
12.	MSMENV272	Participate in environmentally sustainable work practices	Core	3	

*Clustered Units

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering Fabrication Trade

Elective Units of Competency

Packaging for a generic fabrication trade qualification - choose a minimum value of 40 points from **Group A**.

Group A - Fabrication Trade generic electives

	Unit Code	Unit Title	Core/Elective	P	Pre Req
1.	MEM05004	Perform routine oxy fuel gas welding	Elective	2	*
2.	MEM05052	Apply safe welding practices	Elective	4	*
3.	MEM05007	Perform manual heating and thermal cutting	Elective	2	*
4.	MEM05051	Select welding processes	Elective	2	*
5.	MEM05012	Perform routine manual metal arc welding	Elective	2	*
6.	MEM05015	Weld using manual metal arc welding process	Elective	4	*
7.	MEM05019	Weld using gas tungsten arc welding process	Elective	4	*
8.	MEM05017	Weld using gas metal arc welding process	Elective	4	*
9.	MEM05049	Perform routine gas tungsten arc welding	Elective	2	*
10.	MEM05050	Perform routine gas metal arc welding	Elective	2	*
11.	MEM05018	Perform advanced welding using gas metal arc welding process	Elective	4	*
12.	MEM05037	Perform geometric development	Elective	6	*
13.	MEM05010	Apply fabrication, forming and shaping techniques	Elective	8	*
14.	MEM05011	Assemble fabricated components	Elective	8	*
15.	MEM08010	Manually finish/polish materials	Elective	6	*
16.	MEM12007	Mark off/out structural fabrications and shapes	Elective	4	*

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering Fabrication Trade

Delivery

The duration for this course in training weeks will be 20 contact hours per week for 94 weeks.

The delivery of competency units has been sequenced to take into account required unit prerequisites.

Core Units Syllabus (12 Units-Total 340 points)

Subject	Outcome (Required Skills & Knowledge)
<p>MEM09002 - Interpret technical drawing (CORE)</p>	<ul style="list-style-type: none"> ○ Understand how to follow work instructions, standard operating procedures (SOPs) and safe work practices ○ Understand how to select, check and validate technical drawing against job requirements or equipment. ○ Skills in interpreting technical drawing through recognition of components, assemblies, objects and symbols ○ Understand how to identify dimensions ○ Understand how to apply drawing conventions appropriate to engineering discipline ○ Understand how to compile a materials list. ○ Understand safe work practices and procedures and use of personal protective equipment (PPE) ○ Understand application of AS 1100 Technical drawing or AS 1102 Graphical symbols ○ Understand conventions used in technical drawings ○ Understand correct interpretation of instructions contained in drawings ○ Understand materials from which drawing object(s) are made and their features and manufacturing and assembly requirements.
<p>MEM11011- Undertake manual handling (CORE)</p>	<ul style="list-style-type: none"> ○ Understand how to work instructions, standard operating procedures (SOPs) and safe work practices ○ Understand how to assess the risks associated with lifting materials manually and determining the most appropriate technique ○ Understand how to select and use the appropriate equipment to move/shift materials ensuring safety of personnel and security of material. ○ Understand safe work practices and procedures and use of personal protective equipment (PPE) ○ Understand manual handling techniques, including individual or team lifting ○ Understand appropriate equipment associated with move/shift materials ○ Understand hazards of incorrect procedures

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering

Fabrication Trade

	<ul style="list-style-type: none"> ○ Understand Safe Work Australia standards for manual handling.
<p>MEM12023- Perform engineering measurements (CORE)</p>	<ul style="list-style-type: none"> ○ Understand how to follow work instructions, standard operating procedures (SOPs) and safe work practices ○ Understand how to identify and interpret measurement requirements from specifications ○ Understand how to select appropriate measuring device or equipment to achieve the required outcome ○ Understand how to obtain measurements in a safe and effective manner and recording measurements, including preparing a freehand sketch which depicts required information, as required ○ Understand how to perform calculations to determine or verify dimensions ○ Skills in storing and maintaining measuring devices including routine adjustments according to manufacturer's specifications or SOPs. ○ Understand safe work practices and procedures ○ Understand correct application of a range of measuring devices ○ Understand correct and appropriate measuring technique for a range of measuring devices ○ Understand calculations, including addition, subtraction, multiplication, division, fractions and decimals ○ Understand manufacturer's or SOPs for handling and storing a range of measuring devices ○ Understand appropriate procedures for adjusting and zeroing a range of measuring devices, including scale adjustment ○ Understand appropriate methods of communicating measurements by drawings.
<p>MEM12024 - Perform computations (CORE)</p>	<ul style="list-style-type: none"> ○ Skills in following work instructions, standard operating procedures (SOPs) and safe work practices ○ Skills in obtaining and interpreting data from job instructions and relevant sources to establish required outcomes ○ Skills in determining the appropriate calculation method to suit the application ○ Skills in performing calculations and confirming answer/s ○ Skills in producing and interpreting simple charts and graphs from given data. ○ Understand safe work practices and procedures ○ Understand formulae applicable to the determination of perimeter, area and volume of simple geometric shapes and the reasons for using dimensions with the same units ○ Understand techniques and procedures for rounding off figures when estimating approximate answers ○ Understand features and use of mixed numbers, decimals, fractions and whole numbers ○ Understand procedures for carrying out calculations involving fractions and using each of the four basic rules of addition, subtraction, multiplication and division

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering Fabrication Trade

	<ul style="list-style-type: none"> ○ Understand concept of percentage and procedures to be followed in converting a decimal and fraction to a percentage ○ Understand concepts and calculations of ratio and proportion ○ Understand scales applicable to the axes of the graphs or charts ○ Understand types of charts and/or graphs used in the individual's field of work ○ Understand upper and lower limits of acceptability applicable to data entered on a graph or chart ○ Understand trends indicated by the slope or gradient of a graph ○ Understand action to be taken when given trends occur or set limits are approached on graphs or charts ○ Understand procedures for drawing 'lines of best fit' ○ Understand trends indicated by the graphs or charts drawn
<p>MEM13015 - Work safely and effectively in manufacturing and engineering (CORE)</p>	<ul style="list-style-type: none"> ○ Skills in following work instructions, standard operating procedures (SOPs) and safe work practices ○ Skills in identifying and avoiding or controlling hazards ○ Skills in reporting hazards, incidents, injuries and other work health and safety (WHS) non-conformances following SOPs ○ Skills in recognising and responding to emergencies following SOPs ○ Skills in identifying and obtaining, instructions and information on job requirements, including one or more of the following: verbal or written job instructions, specifications, SOPs, charts, lists. ○ Skills in identifying and responding to contingencies, including: equipment breakdowns, non-conforming components, safety hazards ○ Skills in recording information into proforma workplace documents, including: production tally form, quality control forms, safety incident forms ○ Skills in performing assigned tasks and checking outcome of own work for conformance to specifications ○ Skills in identifying own responsibilities within the workplace quality system ○ Skills in giving and receiving feedback on own and group work ○ Skills in seeking assistance from supervisors and mentors. ○ Understand safe work practices and procedures and use and application of personal protective equipment ○ Understand basic quality system terminology and concept, including: quality assurance, quality control, quality improvement ○ Understand procedures to be followed in performing own work ○ Understand objectives, requirements and specifications to which the individual's work is to comply ○ Understand costs and consequences of poor quality

Course Outline

Fabrication Trade

<p>MEM18001 - Use hand tools (CORE)</p>	<p>reasons for monitoring trainee's progress, reporting procedures</p> <ul style="list-style-type: none"> ○ Skills in following work instructions, standard operating procedures (SOPs) and safe work practices ○ Skills in selecting and using hand tools to produce the desired outcome to job specifications ○ Skills in following designated procedures for dealing with unsafe or faulty tools ○ Skills in undertaking routine maintenance and cleaning of hand tools, including storage. ○ Understand safe work practices and procedures and use of personal protective equipment (PPE) ○ Understand features and applications of different hand tools used in a general engineering context, including hacksaws, hammers, punches, screwdrivers, sockets, wrenches, scrapers, chisels, gouges, wood planes and files of all cross-sectional shapes and sizes ○ Understand common faults and/or defects in hand tools ○ Understand procedures for marking unsafe or faulty tools for repair ○ Understand routine maintenance requirements for a range of hand tools, including lubricating, tightening, simple tool repairs and adjustments using engineering principles and relevant equipment ○ Understand storage location and procedures for a range of hand tools.
<p>MEM18002 - Use power tools/hand held operations (CORE)</p>	<ul style="list-style-type: none"> ○ Skills in following work instructions, standard operating procedures (SOPs) and safe work practices ○ Skills in selecting and using a range of hand held and fixed power tools for a variety of general engineering applications ○ Skills in following designated procedures for dealing with unsafe or faulty power tools ○ Skills in undertaking routine maintenance and cleaning of power tools, including storage. ○ Understand safe work practices and procedures and use of personal protective equipment (PPE) ○ Understand features and application of different power tools ○ Understand clamping/securing methods ○ Understand adjustments/alignments to a range of power tools ○ Understand common faults and/or defects in power tools ○ Understand procedures for marking unsafe or faulty power tools for repair ○ Understand routine maintenance requirements and cleaning of a range of power tools ○ Understand storage location and procedures of a range of power tools.

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering

Fabrication Trade

MSMENV272 - Participate in environmentally sustainable work practices (CORE)

- Understand followed environmental policies and identified potential breaches of environmental regulations and suggested improvements within the limit of own authority.
- Understand environmental sustainability issues relevant to organisation
- Understand resource use and impact of inefficiencies associated with own work role
- Understand environmental and resource efficiency policies and procedures for own work role
- Understand environmental regulations and guidelines and their impact on own work role
- Understand the environmental issues, hazards and risks associated with own work role

MEM05004 - Perform routine oxy fuel gas welding (ELECTIVE)

- Skills in following work instructions, standard operating procedures (SOPs) and safe work practices
- Skills in cleaning and preparing materials for welding
- Skills in setting up: gas cylinders, hoses, blowpipes, tips and nozzles, regulators, flashback arrestors
- Skills in selecting settings and consumables
- Understand butt and fillet weld materials to comply with specifications
- Understand cleaning welds according to SOPs.
- Understand safe welding practices and procedures and use of personal protective equipment (PPE)
- Understand preparatory requirements
- Understand equipment and equipment settings
- Understand purpose of, and setting up requirements, of: gas cylinders, hoses, blowpipes, tips and nozzles, regulators, flashback arrestors
- Understand fuel gas properties and applications
- Understand weld characteristics

MEM05007 - Perform manual heating and thermal cutting (ELECTIVE)

- Skills in following work instructions, standard operating procedures (SOPs) and safe work practices
- Skills in selecting equipment appropriate to the material
- Skills in checking condition of equipment
- Skills in setting up: gas cylinders, hoses, blowpipes, tips and nozzles, regulators, flashback arrestors
- Skills in operating equipment to cut materials making appropriate cutting allowances to ensure material is used in most economical way
- Skills in identifying defects and taking appropriate remedial action
- heating material to specification
- Skills in checking final product for compliance with specifications.
- Understand safe work practices and procedures and use of personal protective equipment (PPE)
- Skills in cutting processes appropriate to various materials
- Skills in heating and cutting specifications
- Understand purpose of, and setting up requirements, of: gas cylinders, hoses, blowpipes, tips and nozzles, regulators, flashback arrestors

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering

Fabrication Trade

MEM05018 - Perform advanced welding using gas metal arc welding process (ELECTIVE)

- Skills in following work instructions, standard operating procedures (SOPs) and safe work practices
- Skills in identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for performing advanced welding using gas metal arc welding (GMAW) process to AS 1554 Structural Purpose
- Skills in selecting appropriate weld and joint preparation methods
- Skills in consistently weld materials to AS 1554 Structural Purpose or equivalent using AC or DC welding machines and electrodes while preventing distortion
- Skills in rectifying any defects
- Skills in completing and maintaining weld records related to GMAW Structural Purpose onto standard workplace forms.
- Understand safe welding practices and procedures and use of personal protective equipment (PPE)
- Understand in-depth knowledge of the properties and characteristics of a wide range of materials
- Understand requirements to conform to AS 1554 Structural Purpose or equivalent
- Understand weld procedures and requirements
- Understand different welder identification systems, including numbering, bar coding, paint coding and letter stamps
- Understand causes of weld defects and methods of rectification.

MEM05019 - Weld using gas tungsten arc welding process (ELECTIVE)

- Skills in following work instructions, standard operating procedures and safe work practices
- Skills in identifying and interpreting specifications from drawings, sketches and verbal or written job instructions for welding using gas tungsten arc welding process (GTAW) to the specified standard
- Skills in selecting appropriate weld and joint preparation methods
- Skills in consistently weld materials to the specified standard using AC or DC welding machines and electrodes while preventing distortion
- Skills in rectifying any defects
- Skills in completing weld records related to GTAW onto standard workplace forms.
- Understand safe welding practices and procedures and use of personal protective equipment (PPE)
- Understand correct welding machine, leads, hand pieces and electrodes
- Understand material preparation
- Understand joint preparations
- Understand electrode classification
- Understand causes of distortion for materials when welded
- Understand causes of defects and methods of rectification
- Understand relationships between amperage, electrode and material
- Understand types of gases and their uses

<p>MEM05049 - Perform routine gas tungsten arc welding (ELECTIVE)</p>	<ul style="list-style-type: none"> ○ Skills in following work instructions, standard operating procedures (SOPs) and safe work practices ○ Skills in identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas tungsten arc welding (GTAW) ○ Skills in cleaning and preparing materials for welding to specifications ○ Skills in setting up welding equipment, including selecting settings and consumables to suit application ○ Skills in consistently welding materials to specifications ○ Skills in cleaning welds in accordance with SOPs. ○ Understand safe welding practices and procedures and use of personal protective equipment (PPE) ○ Understand preparatory requirements ○ Understand equipment and equipment settings ○ Understand shielding gas properties and applications ○ Understand weld characteristics.

Course Outline

MEM 30319 (CRICOS code 0100627)

Certificate III in Engineering

Fabrication Trade

MEM05050 - Perform routine gas metal arc welding (ELECTIVE)

- Skills in following work instructions, standard operating procedures and safe work practices
- Skills in identifying and interpreting specifications from sketches and verbal or written job instructions for performing routine gas metal arc welding (GMAW)
- Skills in cleaning and preparing materials for welding to specifications
- Skills in setting up welding equipment, including selecting settings and consumables to suit application
- Skills in consistently welding materials to specifications
- Skills in cleaning welds in accordance with SOPs.
- Understand safe welding practices and procedures and use of personal protective equipment (PPE)
- Understand different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations
- Understand material and equipment preparation
- Understand properties and characteristics of materials and consumables
- Understand equipment and equipment settings
- Understand shielding gas properties and applications
- Understand post-welding treatments
- Understand weld characteristics.

MEM05051 - Select welding processes (ELECTIVE)

- Skills in following work instructions, standard operating procedures (SOPs) and safe work practices
- Skills in identifying properties of common used metals
- Skills in identifying potential contingencies and considering solutions
- Skills in identifying and selecting appropriate welding process and the effects of the welding process on materials
- Skills in identifying processes for cleaning and preparing metals and the role of contaminants in welding flaws
- Understand safe welding practices and procedures and use of personal protective equipment (PPE)
- Understand properties and characteristics of commonly used metals and materials
- Understand basic metallurgy principles associated with alloys and grades of metals
- Understand uses and purposes of various metals
- Understand distortion prevention measures for various metals
- Understand different types of electrodes
- Understand hazards associated with the use of chemicals and the fumes emitted by welding processes.

MEM05052 - Apply safe welding practices (ELECTIVE)

- Skills in following work instructions, standard operating procedures (SOPs) and safe work practices
- Skills in identifying and interpreting work health and safety (WHS) information and legislation
- Skills in identifying risks and hazards associated with welding

Volume of Learning

The volume of learning allocated to a qualification will vary depending on the level of the qualification and the experience and competency of the student. Students must complete the allocated hours for the qualification they are undertaking in order to achieve competency. If the student applies for RPL or Credit Transfer, the volume of learning may be reduced. The hours that make up the volume of learning for 0100627 Certificate III in Engineering are:

Category	Hours
Classroom Based Learning	1200
Simulated/Practical Assessments	709
Workplace Learning	416
Total	2325*

**The total volume of learning for a Certificate III level qualification must be at least 1200 hours*

Assessment Methods

Assessment is structured throughout the course. If students are unable to achieve competency, additional support is provided through mentoring and access to re-assessment as outlined in our policies and procedures. Assessment requires achievement across all tasks to demonstrate competence and includes:

- Written Assessment
- Portfolio of Evidence including Third Party Report
- Simulated/Practical Assessment (demonstration of skills)
- Workplace observation and demonstration

Certificate III in Engineering Fabrication Trade

Recognition of Prior Learning (RPL)

Students who have completed corresponding units of competency and/or units contained within the packaging rules can apply for Credit Transfer. RPL evidence must include some of the following:

- Work Experience
- Life Experience
- Previous Study e.g. qualifications, industry training
- Professional Development Programs and/or Courses

Resources

Students will be provided with the following resource handouts required to complete the 0100627 Certificate III in Engineering – Fabrication Trade upon enrolment:

- Marking-Off Techniques for Metal Fabrication by CEC Cox and Graham Myer
- Welding and Metal Fabrication by Larry Jeffus

Relevant Industry Standards

Superior Training Centre's delivery and assessment of the 0100627 Certificate III in Engineering complies with the following Australian standards:

- AS1100 Claus 101, 201, 301, 401 and 501
- AS1250
- AS1554-2004

Total Course Fees

\$ 1,000	Deposit ONSHORE (non-refundable). This amount comes out of subsequent course fees.
\$ 5,000	Deposit OFFSHORE (AUD\$1,000 non-refundable). This amount comes out of subsequent course fees.
\$26,000	Total Course Fees (paid by payment plan)
\$ 1,000	Resource Fee for all books and materials

Campus Details and Facilities

Superior Training Centre is located at 1/13 York Road, Ingleburn NSW 2565.

The campus at Ingleburn provides quality teaching and learning facilities for students. The training facilities have been set up to run classroom based training sessions, to support the learning and assessment programs we offer.

The campus includes well-appointed facilities that offer a comfortable learning environment.

Library Services

Ingleburn Library is available to students to assist them with their study. The library is located at 76 Oxford Rd, Ingleburn NSW 2565 and is just a 15 minute walk from the campus.

Important Information – Student Handbook, Policies and Procedures, Fees and Charges

Information about our training and assessment policies and procedures are included on our website www.stc.nsw.edu.au and should be read by you, prior to enrolment in addition to the Student Handbook which is also located on our website. These documents contain important information about your training course, fees and charges including our refund policy.

Identification of Student Needs and Student Support

Student needs are declared by the applicant at the time of enrolment: the application form allows the applicant to self declare where they have learning disabilities.

Every student is interviewed either face to face or over the telephone to attempt to establish the applicant skill and knowledge levels, their current employment and how that relates to the course content and interaction.

Where language literacy and numeracy are in question, Superior Training Centre has a language literacy and numeracy assessment they may undertake to confirm their level of language, literacy and numeracy skills.

Reasonable adjustments to training and assessment will be made and additional support (e.g. LLN, assistive technology, additional training, alternative delivery and assessment modes and methods) provided where students with physical attributes or specific learning needs are identified as requiring these changes to complete their training and assessment.
